Step 1: Accessing the Health Atlas

Visit the Hillsborough County Health Atlas at www.planhillsborough.org/health-atlas
Step 2: Making the Health Atlas larger

From the landing page, you can expand the map by clicking “View this map fullscreen”
Step 3a: Viewing map content

The top right box contains all of the layers available in the Health Atlas. Clicking the arrows next to a category will expand the layers available in each category.
Clicking the eye icon next to a layer will cause the map to populate with that layer’s content. When the map populates, the legend on the left will update with the list of unique features available in that layer.
Step 4: Viewing feature details

Clicking a unique feature on the map will display a pop-up box with that feature’s additional details. For instance, this pop-up shows the Thonotosassa community with a link to the community plan and sociodemographic data report.
Step 5: Closing pop-ups and turning off layers

Click the X on the pop-up to close it.

Click the highlighted eye icon next to a feature to remove it from the map and legend.
Step 6: Zooming in and out

You can zoom in or out by using the + and − icons on the top left of the screen.

Alternatively, you can zoom using your mouse wheel: scroll up to zoom in, and scroll down to zoom out.
Step 7: Returning to original zoom level

To return to the level of zoom you entered the map with, click the home button at the top left of the screen.
Step 8: Closing and reopening the legend and layers tab

Click the double arrow button to close the respective legend or feature pane.
Click the three horizontal lines button to reopen the pane.
Step 9: Searching for an address or location

Click the magnifying glass button in the top right of the map to search for an address.

When you select an address from the list or hit the Enter key, the map will automatically zoom to your selected location.
Step 10: Viewing data sources

The ‘Indicators/Data Sources’ tab in the top right contains the sources and data links for layers contained within the Health Atlas.
Step 11: Viewing Additional Resources

The **Additional Resources** tab contains data and resources complementary to the Health Atlas.
Step 12: Changing the Basemap

Next to the legend button is a Basemap Gallery button. This button allows you to change the background map displaying behind the layer content.
Accessing Community Sociodemographic Reports

Some layers, specifically the Tampa Neighborhoods and Unincorporated Hillsborough County Communities layers, have multiple features on top of one another.

For instance, Ruskin is both its own community and considered part of greater SouthShore.
To access a community’s Community Plan or Sociodemographic Report, click into that community on the map when the Unincorporated Hillsborough County Communities layer is active.

You will see an arrow in the pop-up box noting that multiple communities are selected.
To access information on your community of interest, simply use the left and right arrow keys at the bottom of the pop-up.
