About

Plan Hillsborough and the University of South Florida are partnering to host a Value Added Mobility Study (VAMS) knowledge share. Value added strategies are public financing tools that recover a share of the financial benefit of public infrastructure investments such as transit or roads which can also spur and increase the worth of private investments. The event will consist of two topic discussions:

1. Defining Value Added and examples of successful implementation around the U.S.
2. Identifying and leveraging unique opportunities and challenges in Hillsborough County.

*Value Added Mobility Study Knowledge Share:
AICP CM Credit Pending*
